Krone mega trailers  
XL Certificated

## *GENERAL GOODS*

This is the most common service we offer to our customers for the transport of general goods that do not require special conditions. For this type of goods, we offer to our customers convertible tarpaulin trailers with variable height. This type of semi-trailer offers easy loading both sideways and back side or vertically, height-adjustable roof, full use of the transport capacity, short loading and unloading times, security features such as aluminum bars separators, reinforced tarpaulin, anchor straps, etc.

# AUTOMOTIVE GOODS

We are specialized in Automotive transport:

- *Services offered* – FTL/ LTL , all range of trucks , JIS/JIT
- *Experience* : 25 Years experience in moving a wide range of critical parts for the automotive industry, spanning the entire supply chain including OEMs and Tier 1, Tier 2 and Tier 3 suppliers
- *Coverage EU* : Our Transport network cover almost whole EU, meaning we can offer/ solve any urgent request when you need it most.
- *24/7 Operations* : Our operation team will work around the clock to coordinate the logistics of your orders and ensure everything runs smoothly.
- *Live Updates*: We'll keep you fully up-to-date on the status of your time-sensitive shipments

# TEMPERATURE CONTROLLED GOODS

When the goods you want to transport fall into the category of goods considered perishable, our team offers you Frigo transport services at a controlled temperature from  $-25^{\circ}$  Celsius to  $+30^{\circ}$  Celsius, all vehicles being equipped with both cooling/heating and with thermo diagram printers, which indicate the temperature throughout the transport. We transport both fresh, semi-frozen, frozen, refrigerated food products, as well as medical products.

## PHARMA GOODS

We offer transport services throughout Europe in Pharma regime for all companies that have specific norms as transport quality standard. For this type of service, VIO TRANSGRUP offers its own fleet of over 150 box vans with controlled temperature from -25° Celsius to +30° Celsius, all properly equipped for the execution of such transports.

# DANGEROUS GOODS

The transport of dangerous goods requires special attention both to the packaging of the goods and to the conditions of transport, as well as to the preparation of the relevant documents so that the transport can take place in the best possible conditions. We offer you transport services for ADR classes 2,3,4,5,6,8 and 9 both in full regime and groupage – in conditions of maximum safety and in compliance with the legal regulations in the field. We offer vehicles with different equipment: removable tarpaulins, mega tarpaulins or box vans with controlled temperature from -25° Celsius to +30° Celsius, all properly equipped for the execution of such transports, equipped in accordance with the provisions of the European Agreement ADR and driven by specialized drivers.

## *HIGH VALUE GOODS*

Since 2010, VIO TRANSGRUP carries out the transport of HVC (High Value Cargo) in special security conditions in accordance with the TAPA TSR level 1 standard, the company being certified according to this standard.

# SPECIAL TRANSPORT

## EXPRESS VAN/CAR

Dedicate Van/Car, for door-door time critical shipment

- experienced drivers
- changing the drivers on route
- Urgent “go-now” parts
- Automotive critical parts
- Prototypes | Samples

## ON BOARD COURIER

We will always ensure that the required delivery deadline is met.

- personalised hand-carry service
- experienced courier
- time critical consignment door-to-door.
- Automotive critical parts
- Prototypes | Samples

## AIRCRAFT CHARTERS

We understand the time sensitive nature of the industry and the importance of parts and equipment being in the right place as soon as possible

- highly experienced cargo team in the ‘go-now’ transport of spares, machinery and vehicles to wherever you need them.
- Large volumes of parts | Urgent ‘go-now’ parts | Machinery
- Finished vehicle logistics | Product launches | Key personnel

## ***GROUPAGE –LTL GOODS***

By transport in groupage regime or LTL (Less than Truck Load) we offer our customers the opportunity to transport smaller quantities of goods, both general goods and temperature-controlled goods or ADR. Quantities of goods can thus be transported below the total capacity of a trailer such as pallets, boxes, bales, packages, etc.

We offer this type of service on the route:

**RO – Germany – RO,      RO- Czech Rep- RO  
RO – Greece – RO,      RO – Italy – RO,  
RO – N EU and UK – RO,  
RO- Neatherland/ Belgium – RO**

having the possibility to take over the goods in the shortest time and at excellent prices.

# TRUCK & TRAILER SERVICE

VIO TRANS GRUP is focused on implementing the business and operations strategies that facilitate a sustainable development

- The company complies with the EU regulations regarding the energy efficiency, quality, water, waste, chemicals, packaging and packaging waste
- To facilitate fuel efficiency, our operations department is working continuously to optimize the road freight operations (e.g., evaluate all route alternatives and implement the most effective one)
- To implement the Environmental Policies and to ensure compliance with the EU regulations, VIO TRANS GRUP has defined the proper documentation and guidelines for all employees
- The steps to the implementation of the Environmental Policies are listed on the left

## Performance review

- Investing in energy-efficient logistics hubs to strengthen multiple distribution points and establish joint delivery to reduce costs and CO2 emissions.

- Crates washing technology with built-in water-efficient regulator & water recirculation system

## BECOMING CLIMATE POSITIVE

- Promoting intermodal transport services and investing in own rail terminal

- E-Trucks program

- Investing in renewable energies

**CONDUCEREA ECOLOGICĂ**

Reprezintă un ansamblu de măsuri comportamentale de control și întreținere a autovehiculului, care realizează:

- Protecția mediului;
- Economie de carburant.

Oncă măsuri prin care se poate economisi combustibilul însemnând presuare corespunzătoare în pneuri, micșorarea rezistenței la învârtire, îmbunătățirea aerodinamiei vehiculului, oprirea motorului în cazul așteptărilor îndelungate, ridicarea greutății la înălțime la deplasarea cu viteză mare, se înscrie în sfera de interes a protecției mediului.

Tot în cadrul aceluiași sistem se înscriu și acțiunile care vizează oprirea sau folosirea rațională a unor sisteme de la bordul autovehiculului (sistemul de aer condiționat, dispozitivele servo, folosirea unor consumabile electrice de mare putere), care sunt alimentate de la motorul acestuia, ca urmare determinând prin funcționarea lor, consumul mare de carburant.

Performance
